FCC MAIL ROOM NOV 2 6 1996 RECEIVED

Before the

FEDERAL COMMUNICATIONS COMMISSION

Washington, DC 20554

In the Matter of)		
Amendment of Section 73.202(b) FM Table of Allotments)	MM Docket RM-	No.
(Detroit, Texas)	Ć	****	

To: Chief, Policy and Rules Division

PETITION FOR RULE MAKING

Great Plains Radiocasting ("GPR"), by their counsel, hereby respectfully requests that the Commission amend Rule 73.202(b), the FM Table of Allotments, to allot FM Channel 294C2 to Detroit, Texas as its first aural service.

In support of this allocation request, the following information is respectfully submitted:

- 1. As is demonstrated in the attached Exhibit 1, Channel 294C2 may be allotted to Detroit when site restricted 23.5 kilometers northwest of the community.
- 2. The petitioner proposes to allot Channel 294C2 to Detroit as a first aural service. Detroit, located in Red River County, is an incorporated community with a 1990 population of 706 persons. Red River County had a 1990 population of 14,317 persons.
 - 3. If Channel 294C2 were allotted to Detroit, the area

would have no difficulty placing a 70 dBu service contour over the entire community of Detroit Exhibit E-2 shows the extent of the 70 dBu coverage as well as the location of the town of Detroit within that service contour. Complete line of sight coverage would also be provided the community of Detroit.

- 4. If the Commission allots Channel 294C2 to Detroit, GPR will immediately tender for filing an application with the Commission seeking a construction permit for the new station. If granted the construction permit, GPR will promptly build the new facility at Detroit.
- 5. In sum, it is requested that the FM Table of Allotments be changed as follows:

	ALLOTMENTS			
COMMUNITY	EXISTING	PROPOSED_		
Detroit, TX	-	294C2		

Based upon the foregoing, GPR hereby respectfully requests that the Commission modify its FM Table of Allotments to allot Channel 294C2 to Detroit, Texas as its first aural broadcast service.

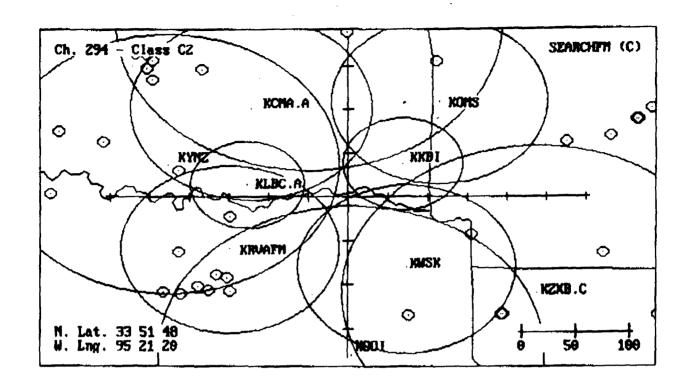

Respectfully submitted,

GREAT PLAINS RADIOGASTING
